Set in a hellish dreamscape subverting the archetypal shanshui or Chinese rockery, video game cutscene ‘InfiniteMother\_v1.0’ bridges connections that cannot be lost—such as inherited genetics—with the filial regret of a wounded Daughter, who anthromorphizes herself into an insectoid to be noticed by her emotionally-absent mother.

**I thought it held my mother's birthwater**

**one she learned from her  
childhood in 廈門**
